# SUBJECT INDEX

## A

- Acetylene
  - chemiluminescence of, 384
  - matrix photoionization of, 86
  - vacuum UV photolysis of, 85
- Aldehydes, aromatic
  - internal and molecular processes in, 115
- Alkali dihalides
  - production of, 85
- Alkali halides
  - dissociation mechanisms of, 198-201
- Alkanone ion
  - P(1) function of, 62
- Alkyl halides
  - PIPECO experiments on, 66
- Anions, parent
  - production of, 97, 98
- Annuales
  - chemistry of, 135, 136
- Argon
  - diluent effects of, 294, 295
  - excitation of, 81
  - ions of, 88, 89, 351
- Atmospheric chemistry
  - See Modeling stratospheric chemical processes and Kinetics of thermal gas reactions and stratospheric chemistry

## B

- Benzene
  - PIPECO experiments on, 66
- Benzenes, monosubstituted
  - metastable peaks of, 73
- Bifluoride ion
  - stability of, 88
- Boron trihalides
  - absorption studies of, 96
- BrHBr radical or anion
  - production of, 87
- Bromine
  - adsorption on graphite, 226, 227
- Butene isomers
  - field ionization study of, 68

## C

- Carbon monoxide
  - computer simulation of, 113
  - self-exchange of, 288
  - vibrationally excited, 284
- Carbon tetrachloride
  - ionization of, 81

## Carbon-two radicals

- multiphoton fragmentation of, 285
- Catalysis
  - see Homogeneous catalysis in solution
- Chloroethenes
  - H-abstraction steps of, 424
- Chloroethylene
  - reaction with CH in troposphere, 425
- Chloromethanes, 423
- CHCl<sup>+</sup>
  - absorption by, 87
- Coherent transient effects
  - see Optical spectroscopy
- Collisional ionization and ion-pair formation, 179-210
  - alkali halides, 198-201
  - angular distributions, 197, 199
  - associative ionization, 197, 206
  - attractive polarization face, 203
  - autoionization, 192-97
  - bond energies for thallium halide dimer, 203
  - branching ratios, 198, 202, 203
  - collisional ionization, 179, 181, 187, 192, 204-9
  - cross section behavior, 191, 204, 205
  - CuI, 199
  - dissociation, 190, 191, 198, 199
  - electron transfer, 182
  - energy levels, 201, 204, 205
  - formalism, 195
  - ionization of oxygen atoms with nitrogen, 208, 209
  - ion-pair formation, 181, 188-92, 198-204
  - M<sup>+</sup> reactions, 209
  - macroscopic methods, 180
  - metastable He atoms, 205
  - molecular beam studies, 179, 180
  - nomenclature, 180, 181
  - nonisotropic distribution, 197
  - Penning ionization, 194, 195, 197
  - post-threshold region, 191
  - production of charged species, 181
  - products of fast carbon atoms, 206, 207
  - rare gases, 194, 203, 204

## rearrangement and dissociative ionization, 196

- SF<sub>6</sub>, 201
- "simple" ionization, 196
- squeeze mechanism, 200
- threshold behavior, 190, 191, 201, 202
- TIM<sup>+</sup>, 203
- time-of-flight technique, 204
- Tl<sub>2</sub>I<sub>2</sub>, 203
- transitions, 189, 195
- translation energy vs internal energy, 201
- U-O, 194, 207, 208
- Cyanide radical
  - reactions with NO, 285
- Cyclobutadiene (CBD), 125, 134-41

## D

- Decalin, supercooled
  - dielectric study of, 114
- Deoxyhemoglobin, 520
- 1,2-Dichloroethane
  - rotational isomerism of, 119
- Dielectric relaxation, 103-22
  - definition of, 103
  - frequency domain in, 103
  - internal field, 104-8
  - anisotropic media, 107
  - cavities, 107
  - electrical field, 105
  - fluctuation-dissipation theorem, 106
  - isotropic array of polarizable molecules, 108
  - linear response theory, 104, 105
  - microscopic theory of fluctuations, 108
  - multimolecular correlation functions, 106
  - permittivity of organic mixtures, 108
  - polarizability, 108
  - poly(n-hexyl) isocyanate, 106
  - time-domain methods, 103
- models of microscopic behavior, 108-21
  - absorption of molecules, 115
  - Berne's method, 112
  - Brownian motion and, 114
  - Budo's model, 116
  - collective properties, 118
  - continuum potential hypersurface, 116

coupling motions, 116  
 depolarization of  
   fluorescence, 114  
 diffusion, 112, 115, 116  
 dipoles, 110, 111  
 electrolytes, 220  
 fluctuation decay in, 119  
 friction, 109-12  
 high frequency model, 117  
 hydrodynamic mechanism,  
   118  
 inertial effects, 117, 118  
 information theoretic  
   construction, 112-14  
 internal degrees of  
   freedom, 109  
 intramolecular motion,  
   115, 116  
 ions, 120  
 Kerr effect, 119  
 kinetic polarization  
   deficiency, 120  
 nonlinear effects, 119, 120  
 pair correlation function,  
   119  
 Raman bandshapes, 112  
 restricted orientation, 114,  
   115  
 rotational diffusion  
   equation, 109  
 rotational isomeric model,  
   115, 116  
 rotational Smolochowski  
   equation, 110  
 rotational velocity  
   correlation function,  
   117  
 "solvent cage" thawing,  
   114  
 spherical harmonics, 112  
 time correlation functions,  
   109  
 unified theory of  
   orientational  
   relaxation, 118  
 variable slip condition, 110  
 Dihalocarbene cations  
   infrared studies of, 97  
 Diphenyl ether  
   dielectric relaxation of, 116  
 Dissociation  
   See Multiphoton dissociation  
     of polyatomic molecules

## E

Electrical discharge, active  
 source of negative ions, 351  
 Energy, vibrational  
   see Vibrational energy  
 Equilibrium statistical  
   mechanics of polar fluids,  
   471-99

electrostatics, 472-74  
 polarizable polar fluids,  
   491-98  
 dipolar chains as A-body  
   potential, 493  
 renormalization in, 493,  
   494  
 SSC integral equation for,  
   496  
 rigid polar fluids, 474-91  
   computer simulation, 481  
   dielectric constant, 474-81  
   Ewald vs MRF method,  
     483  
   integral equations, 488  
   Lennard-Jones as reference  
     fluid, 488  
   mean spherical model, 488  
   Stockmayer fluid, 488  
   thermodynamic  
     perturbation theory,  
     485

## Ethane

1,1,1-trichloroethane, 108  
 Extended X-ray absorption in  
   fine chemical structures,  
   215-36  
   accuracy, 233  
   amplitude function, 234, 235  
   applications, 222-33  
   catalyst structure, 228, 229  
   electron energy loss  
     spectroscopy, 228  
   EXAF spectra, 229, 232  
   Fourier transforms, 221,  
     229  
   metalloproteins, 222, 226  
   Mo complexes, 225, 227  
   multiple shell fits, 223  
   nitrogenase enzyme  
     system, 223  
   phase shift function, 221  
   organometallic chemistry,  
     222-26  
   solution system, 229-32  
   supersonic conduction,  
     232, 233  
   surface studies and,  
     226-28  
   two-shell structure, 224,  
     225  
   water molecules, 230  
 bond length, 233, 234  
 phase shift, 234  
 EXAFs structure probe,  
   215-17  
   coherent unscattered  
     electrons, 216  
   electron backscattering, 220  
   energy range of spectrum,  
     216  
 EXAF spectroscopy, 215  
 experimental techniques, 222  
 long-range order, 216

photoemitting element, 216  
 radial structure function,  
   220  
 separation of absorption  
   edges, 216  
 structure parameters, 221  
 theory and analysis  
   procedures, 219-21

## F

## Ferroheme

deoxymyoglobin and, 517  
 Fluids

See Renormalized kinetic  
 theory of dense fluids  
 and Equilibrium  
 statistical mechanics of  
 polar fluids

## Fluoroform

electron-capture product of,  
 99

## Four-center (4-C) metathesis

reactions, 271-307  
 breaking of B-C bond, 272  
 classification, 273  
 elastic collision between  
   spheres, 272  
 elimination reactions, 275-78  
 chemical activation by O,  
   276, 277  
 insertion of CH<sub>3</sub> into C-H  
   bond, 276  
 photo-excitation of olefins,  
   277  
 substituted ethanes, 276  
 exchange reactions, 284-93  
 chemiluminescence  
   measurements, 286  
 conversions by shock  
   heating, 285  
 H<sub>2</sub>/D<sub>2</sub> exchange, 289-93  
 H<sub>2</sub>/O<sub>2</sub> combustion, 284  
 impurity effects, 289, 290  
 lower activation energy,  
   288  
 reflected shocks from  
   ToF/MS and IR  
   emission, 290, 291  
 shock-tube studies, 270,  
   284, 286-89, 292  
 steps in complex  
   mechanisms, 284-93  
 very fast reactions, 284  
 (H<sub>2</sub>+ D<sub>2</sub>) exchange, 293-306  
 activation energies, 296  
 argon diluent effects, 294  
 computations of, 297-306  
 conversions in H<sub>2</sub>/D<sub>2</sub>  
   mixtures, 298, 299  
 experiments, 293-97  
 forbidden processes,  
   301

geometric configurations of molecules, 301, 302  
 homogeneous vs heterogeneous reactors, 296  
 interactions between diatoms, 300  
 kinetics, 297  
 levels of impurities, 295  
 master equation of inelastic and reactive cross sections, 305  
 quantum mechanical translation in  $H_2/D_2$ , 306  
 rate constants, 295  
 reaction products of  $H_2$  and  $D_2$ , 299, 300  
 statistical aspects of, 305  
 Stimulated Raman excitation and, 297  
 3-C vs 4-C surfaces, 303  
 trajectory calculations, 304  
 unanticipated features, 294, 295  
 unidirectional first order process, 307  
 highly polar intermediates, 273, 274  
 atom exchanges between alkali halides, 273, 274  
 potential surfaces, 274  
 sequential structures, 274  
 ion-molecule reactions, 275  
 long-lived bridged intermediates, 278, 279  
 prototype ( $H_2 + I_2 = 2HI$ ), 283, 284  
 quantum yields of, 283  
 reactions with other halogens, 283  
 vibrational excitation of  $U_2$ , 284  
 reactive collision between particles, 272  
 symbolic representation, 271  
 uncentered and bridged polycenter intermediates, 279-82  
 direct biomolecular exchanges, 280  
 group switching reactions, 280, 281  
 interhalogen reactions, 281, 282  
 reactions with boron, 279-81  
 3-C displacement mechanism, 280  
 vibrational excitation, 273

**G**  
 Gases, noble  
   see Molecular ion spectroscopy in noble gases  
**H**  
 1,2-Haloethanes, 115  
 Halogens  
   interhalogen reactions, 281, 282  
 Halo-hydrocarbon ions  
   dissociation reactions of, 61  
 Hemes  
   characteristics for globin, 528  
   see also Model heme compounds  
 Hemoglobin and myoglobin  
   kinetics, 503-40  
   Bohr effect in, 527, 528  
   concentration of, 507  
   cycles of Hb and ligand, 507  
   hybrids, 520-24  
    $\alpha$ - $\beta$  chains, 520-23  
   experiments on, 520-23  
   hemoglobin kinetic studies of, 523, 524  
   irreversible two-step mechanisms, 507  
   mammalian myoglobins, 532, 533  
   mathematics, 506-7  
   methodology, 506-8  
   models, 508-15  
     Adair and MWC allosteric models, 508, 509  
     constants of  $I^*$  and  $K^*$ , 511  
     dithionite effects, 510  
     flow-flash experiment, 513  
     K and I, 510, 511  
      $I'$  and  $K'$ , 511  
     ligands, 509, 510  
     methemoglobin altered to hemoglobin, 511-13  
     oxygen effects, 513  
     oxygen related to ligands, 510  
     rate constants, 509  
     simple Mby, 509  
     statistical considerations, 508  
     techniques and strategies, 513-15
